- Next.js
- Node.js
- Express
- Tailwind
- MongoDB
- Postman
- Figma
- Full Stack
- API
- Clerk
- Supabase
- OpenAI

WORK EXPERIENCE

Web Developer

Cooper's Floors | Andover, MN

Jul 2023 – Sep 2023

Redesigned the Cooper Floor's website to enhance usability, facilitate user engagement between customers and staff, and modernized its aesthetics for improved functionality. Additionally, optimizing the forms for customer inquiries on products and quotes resulted in increased store sales.

Web Developer

Anoka Technical College | Anoka, MN

Jan 8 – May 20

I collaborated with a team of three developers to design and develop an automated evaluation web application tailored for use by students and professors. In this project, my primary responsibilities included serving as the lead designer and backend developer, with additional involvement in front-end development.

Welder

Tennant company | Golden Valley, MN

Nov 2021 – Present

Perform gas shielded MIG welding, including grinding and spatter removal. Layout, fit, and fabricate metal components for structural forms. Utilize hand and power tools, bolt, clamp, and tack-weld parts for secure assembly. Conduct self-inspection for quality assurance and interpret instructions from work orders and blueprints.

EDUCATION

Associate in applied science degree – Software Development

Anoka Technical College

Jan 2022 – Dec 2024
